

Introduction to Charts

Description: This project is designed as introduction to Microsoft Excel and charts. There are multiple chart templates that teachers may choose from for the class. The teacher will guide the students through the polling process and the students enter the data to create the charts. (The templates have been formatted to automatically pop up once a number is entered in the data table.

Standards:

Tips: The templates are located on the tabs at the bottom of the Excel Spreadsheet. If you have another idea for a chart feel free to create your own. If you need assistance or would like a template added see your TIS.
